

Vitaliy Parygin

**Senior Python Backend / AI Engineer | AI Agents | ERP Automation | Python • FastAPI
• Odoo • Docker • RAG • LLM • PHP**

 Dnipro, Ukraine

 vitaliy.parygin@gmail.com

 Telegram: betal2003

Professional Summary

Senior Python Backend Engineer with 16+ years of commercial software development experience and 7 years specializing in Odoo/ERP systems.

Experienced in designing scalable backend services, REST APIs, business automation platforms, and enterprise integrations using Python, FastAPI, PostgreSQL, Redis, Docker, and modern backend architecture.

Recently focused on AI-powered backend systems, Retrieval-Augmented Generation (RAG), LLM integrations, multi-agent architectures, and intelligent business process automation.

Looking for Senior Python Backend / AI Engineer opportunities where backend engineering and Generative AI intersect.

AI / LLM Experience

Strong interest in AI-powered backend systems, LLM integrations, and agent-based architectures.

Experience includes:

- OpenAI API
- ChatGPT integrations
- AI automation workflows
- Prompt engineering
- AI-powered business process automation
- Python backend services for AI integrations
- REST API orchestration
- Async/background task processing
- Telegram bots and conversational workflows
- Data processing and ETL pipelines
- FastAPI microservices

- Dockerized AI-related services

Currently expanding expertise in:

- LangChain / LangGraph
- AI Agents
- Multi-agent systems
- RAG pipelines
- Vector Databases (Qdrant)
- MCP / tool calling architectures
- AI Workflow Orchestration
- LLM Tool Calling
- AI workflow automation

Looking for opportunities as:

Senior AI/LLM Python Developer, AI Backend Engineer, AI Agent Developer, or GenAI Engineer.

Selected AI Projects

AI ERP Assistant (in progress)

Production-grade multi-agent AI assistant for ERP systems.

Stack:

- Python
- FastAPI
- LangGraph
- LangChain
- OpenAI
- Qdrant
- PostgreSQL
- Redis
- Docker
- LangFuse Key Features
- PDF ingestion pipeline
- Document parsing and chunking
- Embedding generation
- RAG pipeline
- Multi-agent orchestration
- Conversational memory
- Streaming responses
- Vector search
- Tool calling
- Citation generation
- Observability

Technical Skills

AI / LLM

- LangGraph
- LangChain
- OpenAI API
- RAG
- Vector Databases
- Qdrant
- Embeddings
- Prompt Engineering
- AI Agents
- Tool Calling
- Conversational Memory
- LangFuse
- RAGAS

Programming Languages

- Python
- PHP
- JavaScript
- SQL

Frameworks / CRM

- Odoo / OpenERP
- FastAPI
- Flask
- Django
- Laravel
- Symfony
- Yii / Yii2
- Zend Framework
- SuiteCRM
- SugarCRM
- CakePHP
- WordPress
- Kohana Framework

Databases

- PostgreSQL
- Qdrant
- MySQL
- Redis
- MSSQL

ORM

- Doctrine ORM
- SQLAlchemy

Backend & Integrations

- Python
- FastAPI
- AsyncIO
- Flask
- SQLAlchemy
- Pydantic v2
- REST API
- SOAP
- RabbitMQ
- ElasticSearch
- ETL
- Memcached
- JSON / XML
- Cron jobs

Architecture

- REST APIs
- Microservices
- Event-driven Architecture
- ETL Pipelines
- Message Queues (RabbitMQ)

DevOps & Infrastructure

- Docker
- Linux
- Nginx
- Apache
- SSH

- Vagrant

Testing & Monitoring

- Pytest
- unittest
- PHPUnit
- SonarCloud
- Locust
- Postman
- Custom auto tests

Frontend / Web

- HTML / CSS
- JavaScript/Jquery
- SCSS / LESS
- Bootstrap
- jQuery
- AJAX

Tools & Methodologies

- Agile / Scrum
 - Jira
 - Redmine
 - Confluence
 - Asana
 - Code Review
 - Team Management
 - Git
 - SVN
 - Mercurial
-

Professional Experience

ISD — PHP Developer

Sep 2024 – Dec 2025

Responsibilities

- Backend development and maintenance of internal business systems
- API integrations and optimization of existing services
- SQL query optimization and debugging
- Participation in code reviews and production support

Technologies:

PHP, Python, MySQL, Redis, Docker, Git

Solve — Python / Odoo Developer, Full Stack Developer

Mar 2015 – Aug 2024

Responsibilities

- Development and customization of Odoo/OpenERP modules
- ERP integrations with external systems and APIs
- Backend architecture and business logic implementation
- Development of REST services and automation tools
- Database optimization and ETL processes
- Participation in full project lifecycle from planning to deployment
- Support and maintenance of production environments

Key Achievements

- Developed and maintained enterprise Odoo solutions
- Designed REST integrations with third-party platforms
- Optimized PostgreSQL queries for high-volume business processes
- Built backend services for ERP automation
- Participated in architecture design and production deployments
- Led code reviews and mentored developers
- High-load systems

Technologies:

Python, Odoo, PHP, PostgreSQL, FastAPI, Flask, Docker, Redis, RabbitMQ, ElasticSearch, JavaScript, Git, GitMaster

PrivatBank — PHP / Full Stack Developer

Feb 2014 – Mar 2015

Responsibilities

- Development and maintenance of internal banking web applications
- Backend and frontend feature implementation
- Integration with internal services and databases

Technologies

PHP, JavaScript, MySQL

EnglishHouse — PHP Developer

Sep 2013 – Mar 2014

Responsibilities

- Website development and support
 - Backend feature implementation
 - CMS customization
-

T3Leads — PHP / Full Stack Developer / Team Lead

Jun 2012 – Sep 2012

Responsibilities

- Team coordination and task management
 - Backend development and project maintenance
 - Integration and optimization tasks
-

Unicorn — Web Developer / PHP Developer

Aug 2010 – Aug 2012

Responsibilities

- Web application development
 - Backend feature implementation
 - Client support and maintenance
-

PintaWebWare — Web Developer

Dec 2009 – May 2010

Responsibilities

- Website development and maintenance
 - Frontend and backend support
-

Education

- National Mining University (2005 – 2010)
 - DTEK College (2002 – 2005)
-

Languages

- Ukrainian — Native
 - English — B1-B2
